

# SEEKING INNOVATORS WITH A PASSION FOR BUILDING THE FUTURE

ROYAL IMPACT  
BAFOKENG ROBOTICSLAB

Join Bafokeng RoboticsLab,  
a MakerSpace for RBN innovators, and  
learn to build Robotics & other hardware  
through Digital Fabrication / Additive  
Manufacturing, Microcontrollers,  
3D Printing, Laser Cutting, Vacuum  
Former, Computer Aided Design, & Coding.

#### WE ARE LOOKING FOR:

- 18 years or older
- Mofokeng or live in Royal Bafokeng Nation (if not Mofokeng)
- Able to commit to a full-time 3-month programme
- Application form will give further submission detail requirements

#### EMAIL

royalimpact@bafokeng.com  
for further details

## REMINDER: BAFOKENG ROBOTICSLAB APPLICATIONS

Do you want to develop a Makers Mindset - creating, experimenting, inventing and finding solutions to real-world problems?

Then we invite you to apply for Royal Impact's Bafokeng RoboticsLab programme.

The 3-month programme will take you from zero knowledge to building robotics and other hardware through digital fabrication / additive manufacturing, microcontrollers, 3D printing, laser cutting, vacuum former, computer-aided design and coding.

Like an entrepreneur, participants must design and build tech products that can be sold at the end of the programme for their own benefit.

Bafokeng RoboticsLab is a critical part of Royal Impact's strategy to make Phokeng one of Africa's foremost producers of tech talent for the future.

To register your interest and to receive application details, please email: [royalimpact@bafokeng.com](mailto:royalimpact@bafokeng.com)

This is a reminder to those who have not registered yet to register before it is too late!
